Entry to spa, adults 2x250 from **NOK 500**

Beavers (Castor Fiber) are fascinating animals. This large rodent builds dams and passageways along the river bank. Many people have a relationship with the animal through films and literature for children, but fewer people have seen it with their own two eyes. At Hurdalsjøen Hotel, we arrange special guided tours to be able to observe beavers more closely.

We begin with a short introductory talk in the lavvu, then make a journey up river in canoes or kayaks.

Beavers are most active in the early morning and in the evening.

Short trip

Gjødingseter River (2 hours)

This river runs into the Hurdalsjøen Lake right alongside the hotel.

Long trip

Hurdal River (4 hours)

This river runs into the north end of Hurdalsjøen Lake. Access via boat or bus before setting off on the canoe/kayak trip.
