

THE TORSBY SKI TUNNEL

The Torsby Ski Tunnel – experience winter on a summer's day

The ski tunnel is open for everyone. The temperature is always at a comfortable -3 degrees Celsius. To go cross-country skiing in the middle of the summer and experience the contrast between a hot summer's day and a controlled environment with perfect skiing conditions can be exhilarating. The ski tunnel is perfect if you want to get an advantage over your opponents, learn how to ski, try the latest equipment, improve your technique or just get a good workout. The tracks follow the natural terrain with two classic cross country tracks and a skate track in the middle.
