

Distillery Tour – Learn more about aquavit

The Arcus Group is a Nordic wine and spirits company and the largest producer of aquavit in the world.

We welcome groups for guided tours in our production facilities and distillery. In our Botanical Room, an expert will explain the various botanicals used in aquavit. The heart of our production is the distillery, with five pot-stills. Here, famous Norwegian and Danish aquavits are distilled, as well as snaps, gin and Norwegian whisky.

Our coopers look after the oak barrels for the maturation of our aquavits. One of our most famous aquavits even mature in sherry casks at sea, crossing the Equator twice during a four months journey. From the balcony in our modern cask tower, you can enjoy the view of 7.300 oak cask and listen to the sound of aquavit maturation....

The guided tour culminates with a tasting of various aquavits selected by our Master Distiller – Welcome!

Facts:

Duration: 2 hours

Suitable for: Groups

Price: from NOK 190 ,- pp tours

Tasting: from NOK 140 ,- pp (age limit 20 yrs.)
