

Fetsund Lenser – spend the night on the river

Experience the national cultural heritage site of the only timber boom facility in Norway. With full access to the river, based facility you have the option of «walking on water» on the floating paths.

From June 2022 the museum offers possibilities for a unique accommodation, as you may rent one of the resting barracks situated directly on the floating paths. Wake up in one of the historical, wooden, and authentic resting barracks, with a beautiful view of the river Glomma and its scenic nature. Some decades ago, this was where the log drivers had their meals and got some rest during working hours.

Enjoy a taste of the popular local specialty pike burger and visit the charming museum shop. The wetlands visitor center offers exciting and family friendly exhibits and activities about the local fauna and flora.

Welcome to an experience you won't forget!
